

# QR SCANNY

a web application to help you promote sustainability

# Topic

Design a web application that can help educate consumers about sustainability through their shopping process. Users can scan products QR code to receive the recyclability and sustainability of the product they just purchased.

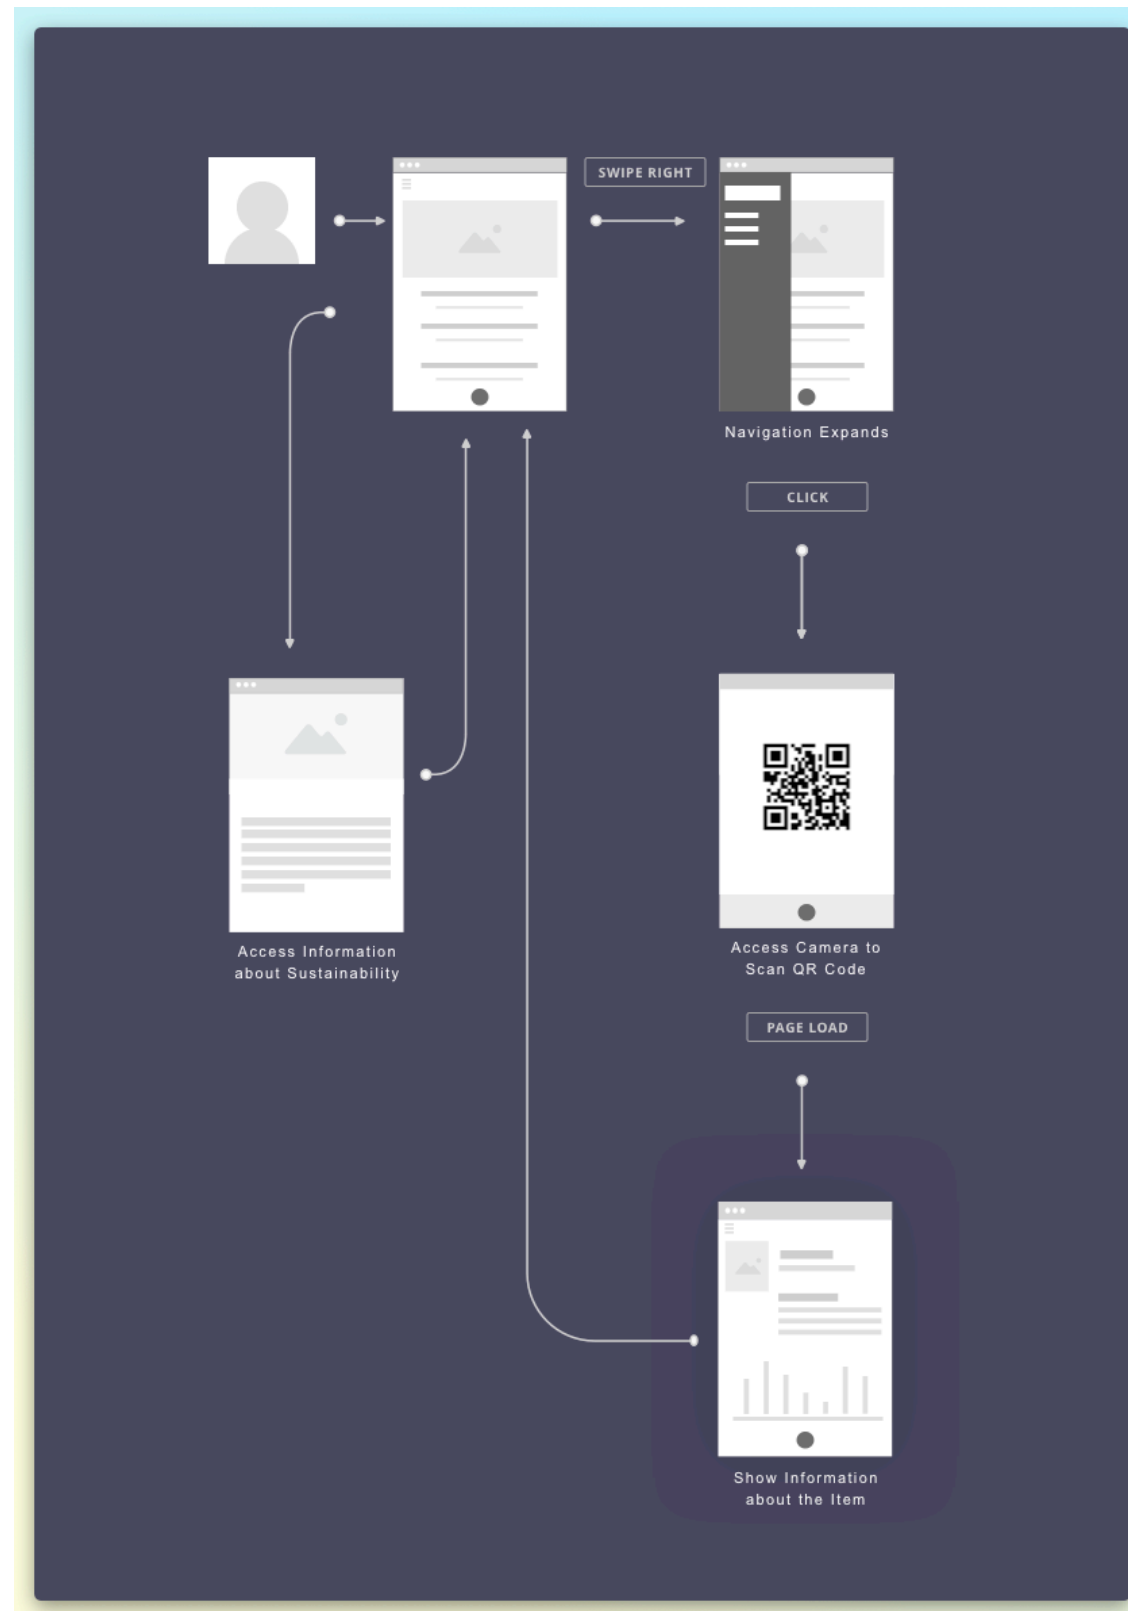

# Wireframe

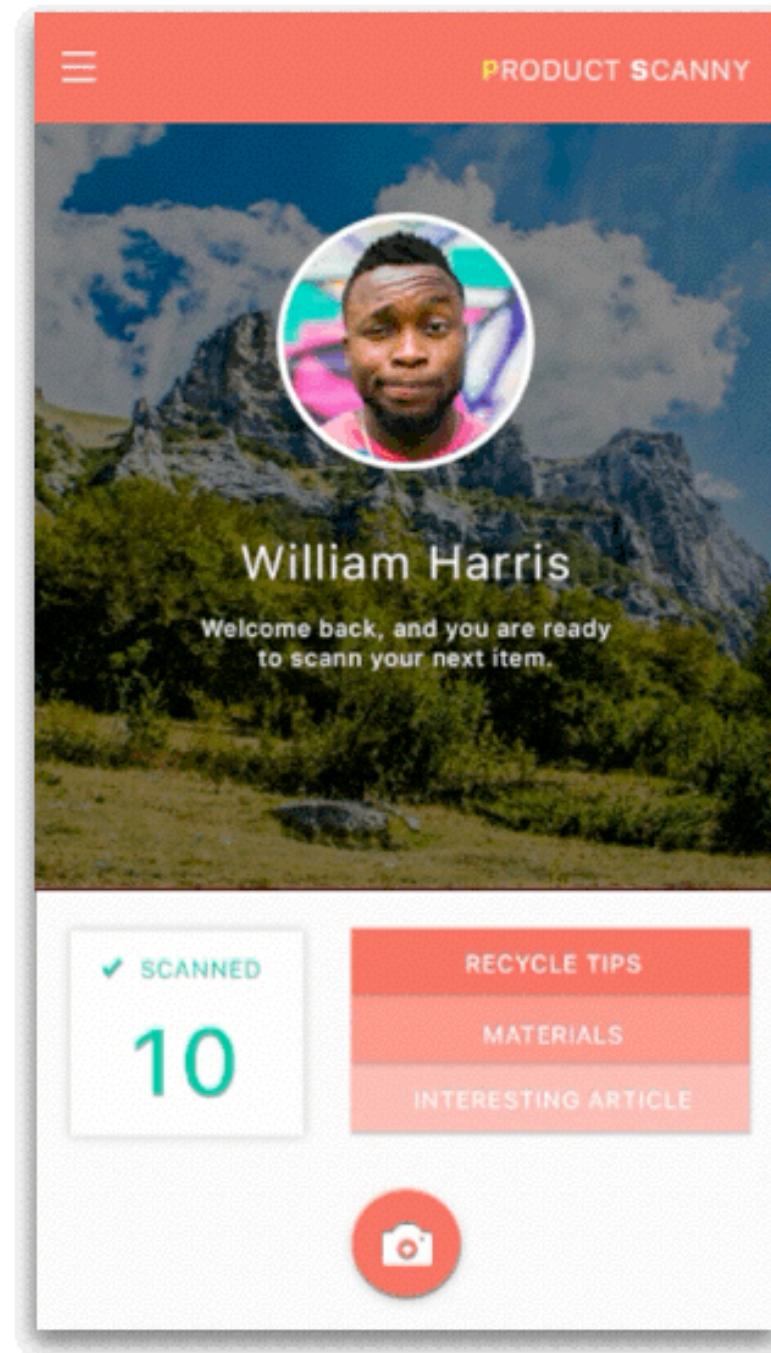

Here is the initial wireframe of my web application. It consists of four pages.

1. Home Page
2. QR Code Scanner
3. Product Information
4. Profile Page

# User flow

**Prototype 2**
